SUMMARY

Software engineer specializing in front-end development, with expertise in React.js and Next.js to create dynamic, responsive, and high-performance web applications. Adept at building scalable solutions and ensuring quality through manual and automated testing using Cypress. Passionate about continuous learning, innovative problem-solving, and delivering solutions that meet both business objectives and user needs.

EXPERIENCE

Admission and Registration Officer
University of Prince Mugrin, Deanship of Admission and Registration – Madinah (On-Site),   **Jul 2024 - Present**
- Supervised students employed under the university's student employment program.
- Reviewed and advised students on academic study plans, enrolling them in courses.
- Contributed to processing student applicants' files and completing their admission procedures.
- Assisted in the preparation and delivery of graduation certificates to graduates.

Software Engineer
Rekaz – Riyadh (Remote),   **August 2024 – Dec 2024**
- Contributed to developing new components for the web builder using React.js, enhancing the user experience.
- Created detailed test cases to ensure features met both business and technical requirements.
- Conducted manual and automated testing using Cypress to ensure the system runs smoothly and all features function properly.
- Identified and tracked bugs during development, documenting them in Notion for the development team to address and resolve promptly.

Front-End Developer - Intern
Bineyes – Riyadh,   **June 2023 - August 2023**
- Contributed to creating a web application prototype design using Figma.
- Developed the front-end of a web application using Django and JavaScript and authored comprehensive software documentation.
- Implemented Agile-Scrum methodology with Jira to streamline project management for front-end development.

EDUCATION

Bachelor's Degree in Software Engineering
University of Prince Mugrin • KSA, Madinah • 2024 • 3.65 / 4.0 GPA
- Achieved Excellent grade with Second Honors for outstanding academic performance.
- Awarded the Prince Faisal bin Salman bin Abdulaziz Award for Academic Excellence in the preparatory year (2020 / 2021).
- Received third place in the UPM Programming Competition.

PROJECTS

Generic E-commerce Platform
University of Prince Mugrin • github.com/gang-of-4/core.git • August 2023 - May 2024
- Developed a generic microservices-based system supporting the Uberization model as my graduation project, which can be customized to fit various systems.
- Contributed to the analysis and design models of the project.
- Engaged in front-end development and testing using Next.js, Cypress, Postman, Jira, and GitHub.

Yalla Sponsor
https://yallasponsor.com • June 2024
- Contributed to designing a web application prototype using Figma, focusing on user friendly interface and modern design.
- Developed a responsive website using Astro.js, React.js, and Next UI.

My Portfolio
github.com/Aghaboon/portfolio.git • February 2024
- A web application that showcases my portfolio.
- Developed a responsive page using Next.js, React.js, and Next UI.

Chat Application
University of Prince Mugrin • github.com/Aghaboon/chat.application.git • April 2023 - May 2023
- Contributed to developing a chat room with a client-server architecture, facilitating simultaneous messaging among multiple users.
- Implemented the project using Python and Tkinter for intuitive user interaction and robust functionality.
